ABSTRACT

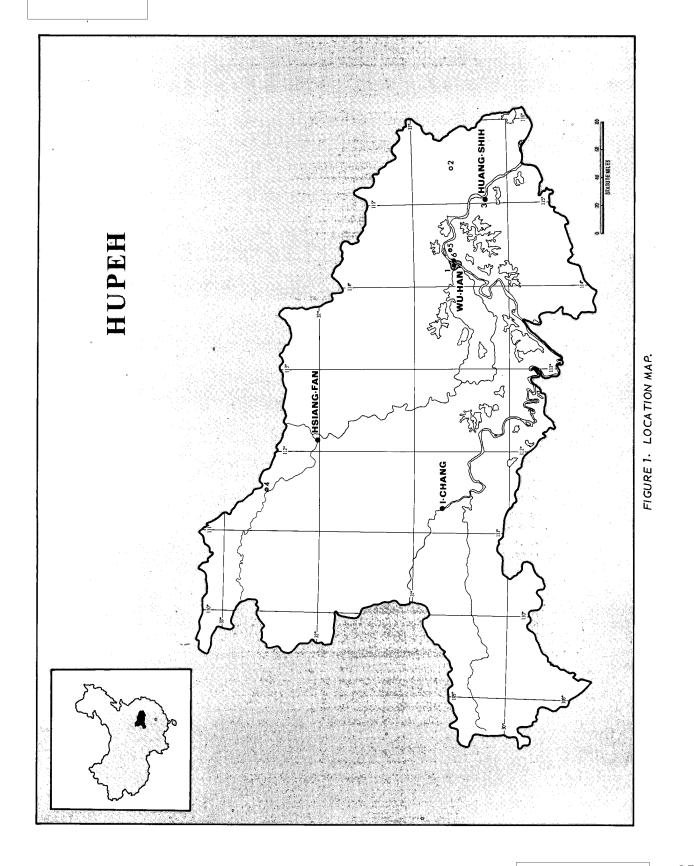

This report, based on 1969 and early 1970 photography, updates the previous basic reports on the six major power plants in Hupeh Province, central China. The cutoff date for information in this report is March 1970.

Construction is continuing at the Kuang-hua hydro power plant. The dam is nearing completion and about half of the powerhouse is roofed. A new switching yard, which will probably replace the previously reported switching yard, has been constructed. The plant has not been seen in operation and it probably is not yet operational.

No construction or dismantling has been observed at the other five plants. On the latest coverage, the Huang-shih plant and the two Wu-han plants were operating. At the Han-kou and Hsi-shui plants, there was no activity to indicate that they were in operation.

INTRODUCTION

This report presents information on the current status of each of the six major electric power plants in Hupeh Province and describes any changes since the previous reports.

The following list of the major electric power plants in Hupeh Province is keyed to figure I.

- I. Han-kou Thermal Power Plant.
- 2. Hsi-shui Hydro Power Plant Pai-lien-ho.
- 3. Huang-shih Thermal Power Plant.
- 4. Kuang-hua Hydro Power Plant Tan-chiang-kou.
- 5. Wu-han Heat and Thermal Power Plant Ching-shan.
- 6. Wu-han Thermal Power Plant 3.
